

Other local and regional groups working towards a decarbonised energy system

Close partnership and collaboration with the regional plans such as SWIC, RWE PZNC, Blue Gem Wind, the Future Haven Waterway Clean Energy Cluster Group and ERM to develop a roadmap for decarbonisation of the Pembrokeshire energy system by 2050 is recommended.

A fully integrated roadmap will enable the implementation of the short-term no regret steps with a view of integrating those with longer term local and regional plans on the journey to decarbonisation.
